ToughCoils™

Information

ToughCoils™

HCL/IH ToughCoils™ have been designed to provide industry leading environmental protection and solenoid performance in a compact and rugged package. ToughCoils™ with integrated connectors are rated up to IP69K environmental protection. ToughCoils™ are available with a variety of popular integrated connection options and with wire leads.

The best in class, one-piece, shell encapsulated design meets the most stringent environmental requirements for mobile and industrial applications.

The exclusive compact coil design from HCL/IH offers the advantage of field retrofitability on all existing and new applications.

ToughCoils™ features

IP69K Environmental Protection - This rating provides protection against the ingress of dust and high pressure jet stream. The IP69K test was designed specifically for rating protection against a high-pressure jet stream, high liquid temperature and close nozzle distance from the enclosure surface. IP69K protection is standard on coils with MetriPac or Deutsch, integrated connectors.

“Thermal shock dunk”

Test - HCL/IH ToughCoils™ have been qualified to withstand the toughest Mobile Equipment “Thermal Shock Dunk” tests. Integrated Deutsch, MetriPack¹ and Leadwire² connectors exceed “Thermal Shock Dunk” test qualifications at 140°C. The “Thermal Shock Dunk” test requires coils to be heated, reaching a stabilized temperature of 100°C, then immediately immersed in a solution at 0°C. The thermal shock is repeated five times with the coil monitored for dielectric strength in the solution and functional performance is verified. In addition, ToughCoils™ passed a more severe powered dunk test conducted from 100° C to 0° C with 115% rated voltage applied.

¹MetriPack® 150 and MetriPack® 280 are registered trade marks of Delphi Packard Electric Systems

²Coils with integrated connectors are recommended for applications in harsh environments.

Field retrofitable -

ToughCoils™ replace all current Eaton coils used on D Frame and Shell type coils. Compact coil dimensions allow substitution in all existing applications. ToughCoils are available for most 8, 10, 12, 16 and 20 series valves. No additional water/weather proofing is required.

Steel Shell encapsulated design -

ToughCoils™ provide protection against physical and environmental damage.

HCL/IH ToughCoils™, with rated connector, meet or exceed all major OEM environmental protection requirements

C13 and C16 Series - coil information

Wattage

C13 (for 13 mm tubes) = 14, 22 & 27 Watts
 C16 (for 16 mm tubes) = 19 & 29 Watts

Voltages

Standard

12 VDC 110 VRAC
 24 VDC 220 VRAC

Special/Optional

Other Voltages are available on request

Alternating current

For AC voltage an ISO4400 rectified connector must be used, as the coils are wound for DC. The correct connector is available from the factory:

110 VAC = AXP9997-115
 220 VAC = AXP9997-230

VDR is fitted for over-voltage protection.
 Diodes are rated at 1.5 amp.

AC Voltage Connector Circuit Diagram

Duty rating

The coil is rated for continuous operation at nominal voltage +/- 10% and an ambient range of -20 to +40.

Note: Coil performance, force produced and power consumed, is affected by the heat of the coil, performance figures given in this catalogue are measured under simulated continuous duty conditions at the coil stabilized temperature. It is important to verify the actual conditions the valve will experience for any given application it should be tested in situ to confirm valve selection.

Wire insulation

The coil winding is copper magnet wire insulation equivalent to class N (200°C).

Encapsulation material

C13, 14 Watt coils and C16, 19 Watt coils are black in colour and made from PBT (Black Polybutylene Reinforced) equivalent to Class F (155°C)

C13, 22 & 27 Watt coils and C16, 29 Watt coils are black in colour and made from IXEF (Black Polyarylamide Reinforced) equivalent to Class H (180°C)

Ingress protection (IP) BS EN 60529

The coil/tube joint is sealed by "O" rings preventing fluid ingress and the possibility of tube corrosion.

Different electrical connectors offer different levels of protection the minimum being the DIN 43650 connector with a gasket at IP65. Integrated Hydraulics offer a wide range of connector types - details of which are available on request.

Connectors

H = ISO4400 Standard DIN43650
 2 pin and earth

F = Black Flying Leads 1.5mm² wire
 600 mm long, 15 AWG, 2.2 mm diameter, Teflon FEP covered (DC voltage only)

DM = Deutsch Moulded 2 way DT04-2P series
 (DC voltage only).

Caution

When handling coils after or during use they may be hot which can cause burning to the skin. Handle with care and use the appropriate equipment.

C13 and C16 Series - solenoid coil

Model code

1 Coil Series

C13 - 13 mm tube
C16 - 16 mm tube

2 Connection

H - DIN43650 ISO Standard
F - Flying Leads
 (12 and 24 VDC only)
DM -Deutsch Moulded
 (12 and 24 VDC only)
 (Consult factory for other options)

3 Voltage

12	12 VDC
24	24 VDC
110	110 VRAC
220	220 VRAC*

*220 to 240 VAC

All AC coils must be used with a rectifying connector:
 (AXP9997- 115 or AXP9997-230)
 (Other voltages available on request)

4 Wattage

C13	C16
14 = 14 Watt	19 = 19 Watt
22 = 22 Watt	29 = 29 Watt
27 = 27 Watt

Electronic controls

Proportional valve control power plugs

EHH-AMP-702-D/K-* Series

For use with valve types:

EPV**-12D-1*

EFV1**-012DE*

ERV1/2**-12D-1*

EPRV1/3**-12D-1*

ESV1**-12D-1*

IRV**-012D-1*

PFR21*

PFR24*

PDR21A*

PPD22**-012D-1*

Application

Primary applications are in the control of non-feedback proportional valves where the cost of more sophisticated electronic controls can be avoided.

Type J is typically used in closed-loop applications.

General description

Three types of plugs, conforming to ISO 4400/DIN 43650 interface, with integral amplifiers and necessary adjustment potentiometers, are designed for use with non-feed back hydraulic valves.

This plug/valve combination offers very low cost solutions to many hydraulic control problems requiring proportional control.

Type D is controlled with a 0-10V command signal, and has adjustable gain, ramp, deadband compensation and dither.

For closed-loop and no ramp applications adjust the ramp port to minimum setting.

Type K is controlled with a 4-20 mA command signal, and has an adjustable ramp time of 50 ms to 5s.

Features and benefits

- Integral amplifier provides essential functions for control of proportional valves
- Adjustable ramp time (types D and K), gain, deadband compensation and dither
- Ease of installation, with reduced cost
- Fully short-circuit and reverse-polarity protected
- Differential voltage command signal (type D)
- Adjustable dither
- EMC to latest European standards
- Protection to IP67

Electrical block diagram

EHH-AMP-702-D/K-*

Note: This product has been designed and tested to meet specific standards outlined in the European Electro-magnetic Compatibility Directive (EMC) 89/336/EEC, amended by 91/26/EEC, 92/31/EEC and 93/68/EEC, article 5. For instructions on installation requirements to achieve effective protection levels, see this leaflet and the Installation Wiring Practices for Vickers Electronic Products leaflet 2468. Wiring practices relevant to this Directive are indicated by a warning symbol and Electromagnetic Compatibility (EMC).

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

2 - M16

Operating data

Electrical

	Types D	Type K
Connections		
1	24V DC	
2	Supply GND	
3	Positive command signal	
4	Negative command signal	
Power (input) supply	18-36V DC including $\pm 10\%$ maximum ripple (peak-to-peak) 24V DC nominal	
Absolute maximum voltage	40V	
Max. power consumption including solenoid	35W	
Reverse polarity protected	Yes	
Short circuit protected	Yes	
Maximum output current	1,6A	
Maximum output voltage typical (1,6A output current)	Typically 1,5V below supply voltage	
Command signal	0-10V (10 kohms)	4-20 mA (250 ohms)
Deadband triggering	200 mV	4 mA
For output (LED on)	200 mV to 10V	4-20 mA
For no output (LED off)	0 mV to 100 mV	0-4 mA
Deadband adjustment range	100 to 1000 mA	
Gain adjustment range	0.02A/V to 0.16A/V	0.01 A/mA to 0.08 A/mA
Dither adjustment range	0 to 500 mA	
Ramp time (types D and K only)	50 ms to 5s	
PWM frequency	1200 Hz $\pm 10\%$	
Dither frequency	120 Hz $\pm 10\%$	
Protection	IEC 529: IP67 (when correctly installed with interface seal in place) Fully short-circuit and reverse-polarity protected	
Isolation to VDE 0110	Group "B"	
Electromagnetic compatibility (EMC):		
Emission	EN 50081-2	
Immunity	EN 50082-2	

Mechanical

Housing	PA6 glass-reinforced plastic (conforming to UL-94HB). Color: gray
Mounting interface	ISO 4400 (DIN 43650)
Cable clamp	Pg9 screw type
Cable diameter	\varnothing 5 to 10 mm (0.197 to 0.394" dia.)
Wire section	0,5 to 1,0 mm ² (20-17 AWG)
Temperature, ambient range	-20° to +70°C (-4° to +158°F)
Mass	0,07 kg (0.154 lb)

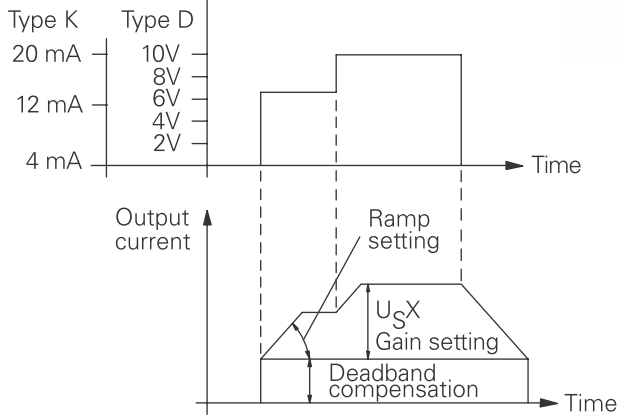

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

Positive Command Voltage

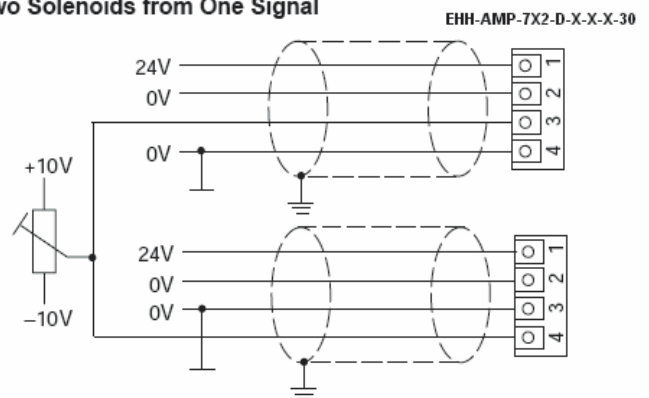

Negative Command Voltage

4-20 mA Command Signal

Bi-polar Command Voltage for Operating Two Solenoids from One Signal

⚠ Warning

Electromagnetic Compatibility (EMC) - Screened cables should be used and particular attention paid to the grounding of the screens as shown in the above diagrams.

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

Installation data

Assembly showing wiring connection points

Warning

Ensure cable clamp nut is adequately tightened to secure cable. Do not connect, or disconnect, the plug while power is on. Do not mount, or dismount, the plug while power is on.

*All seals must be fitted correctly at plug installation to provide protection to IP67 (IEC 529).

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

Start-Up procedure

- With the plug correctly wired but not mounted to the load provide with a DC power supply (See table).
 - Apply the command signal (ON) and check the Power ON LED (RED) illuminates. Reduce the signal to the Command signal (OFF) level and check the LED (RED) goes out.
 - If there is malfunction to the LED replace the plug.
 - Switch off the power supply and command signal and connect the plug to the load. Ensure that the interface seal is correctly fitted and clamped between the mounting faces (essential for IP65 protection). Tighten the retaining screw.
 - Ensure that no damage or injury will occur on the machine when the valve is operated.
- Switch on the power supply. Apply the command signal.
 - (a) Observe Power On LED (RED) is ON.
 - (b) Observe PWM LED (Orange) is ON.If LED is not operated then there is short circuit in the load. Replace the load/ load coil.
 - Successful completion of these steps means that the plug and load are ready for normal use.

Spare parts

The only spare part available is the interface seal, part number 732100.

Ordering procedure

Order plug by full model code, and spare interface seals by part number 732100.

Electronic controls

“Soft Switch” power plugs

EHH-AMP-702-C-*
10 Series

For use with valve types:

- EPV**-12D-1***
- EFV1**-012DE***
- ERV1/2**-12D-1***
- EPRV1/3**-12D-1***
- ESV1**-12D-1***
- IRV**-012D-1***
- PFR21***
- PFR24***
- PDR21A***
- PPD22**-012D-1***

Application

Focus applications for this plug are in the control of hydraulic solenoid operated directional and pressure control valves where control of valve response time can significantly reduce shocks in the hydraulic system.

Best results in reducing hydraulic shocks will only be obtained by using valves with the right “low shock”, or “proportional” features.

General description

These plugs, conforming to ISO 4400/DIN 43650 interface, offer adjustable, ramped on/off switching times through the use of an integral amplifier.

The switching time range is 50 ms to 5 seconds.

The soft switch plug is rated for 24V DC nominal and controlled by a 24V logic signal. Applying an “on” signal causes the output current to ramp up to, and stay at, an adjustable maximum while the “on” signal is maintained. At “switch-off” the output current is ramped down to zero and will remain at zero until the next “on” signal.

Ramp times (switching times) can be adjusted by an in-built potentiometer.

An adjustment also allows for compensation of any deadband in the valve.

Features and benefits

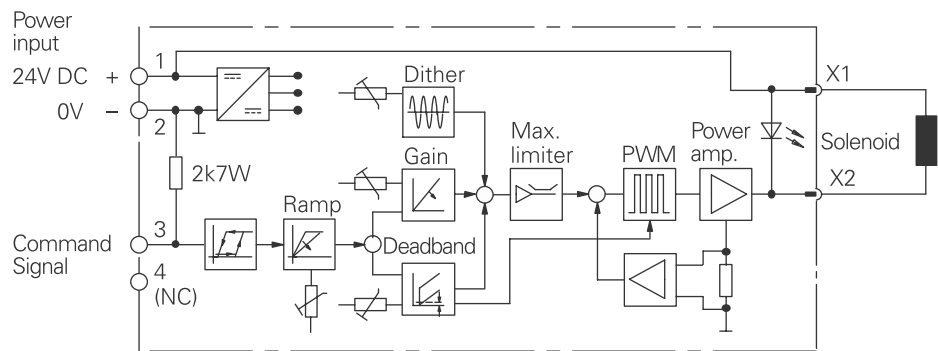

- Integral amplifier provides control from on/off logic command signal
- Adjustable ramp time
- Deadband compensation
- Adjustable output level
- Adjustable dither
- EMC to latest European standards
- Improved switching time repeatability
- Fully short-circuit and reverse-polarity protected
- Protection to IP67

Warning

Ensure cable clamp nut is adequately tightened to secure cable. Do not connect, or disconnect, the plug while power is on. Do not mount, or dismount, the plug while power is on.

*All seals must be fitted correctly at plug installation to provide protection to IP67 (IEC 529).

Where measurements are critical request certified drawings. We reserve the right to change specifications without notice.

Start-Up procedure

- Correctly wire the plug and, before mounting it on the valve solenoid, apply 24V DC (18 to 36V limits) to the “power input” terminals.
- Check for correct plug function by illumination/non-illumination of the LED:
 - a. Apply less than 2 to 3 volts to the input terminal: LED should not be illuminated.
 - b. Increase voltage: the LED should illuminate when the voltage reaches 11V.
Do not exceed 30V command signal.
 - c. Decrease voltage: the LED should go off when the voltage is less than 5V.
- Switch off power supply and command/input signal and then install plug on solenoid. Ensure that all seals are fitted correctly and clamped as the retaining screw is tightened: this is essential in providing IP67 protection.
- Ensure that the hydraulic system will not cause any erratic movement of actuators, then:
 - Switch on power supply again.
 - Repeat LED/function check as in 2.An LED malfunction now indicates a short circuit at the load.
- Successful completion of these checks means that the plug and load are ready for use.

Spare parts

The only spare part available is the interface seal, part number 732100.

Ordering procedure

Order plug by full model code, and spare interface seals by part number 732100.
