

HYDRAULIC CONTROLS Pty Ltd

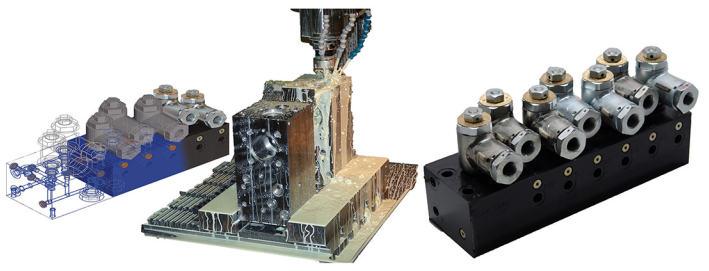

Celebrating 50 years as Australia's most trusted Fluid Power experts

Services

Design & manufacture specialized hydraulic system and components.

Products

- Design & manufacture of speciality valves & components.
- Range valves suitable for industrial and explosion proof applications.
- Engineering solution provider specialising in Hydraulic valves and HIC's (Hydraulic integrated circuits).
- Biggest stockist of Eaton, Integrated and Danfoss valves in Australia
- Manifolds

Capabilities

- 10 CNC machines
- Capable of milling up to 962mm x 650mm x 700mm.
- Component Manufacturing.
- Design > Prototype > Manufacture Runs.
- SolidCAM CAM (Computer Aided Machining)
- Solidworks (3D Modelling and Testing)
- Solidworks CAD 3D Modelling.

Discriminators

- State of the art Okuma machines CNC machines
- Full solution provider multiple options and lower costs
- Able to adapt to customer demand.
- Full in-house design and manufacture process
- Highly experienced team specialising hydraulic design and fabrication
- Industry 4.0 capably.

Hydraulics and pneumatics & Precision machining

Key Customers

Explosive proof hydraulic components and systems

Quality & Accreditation

Operating at ISO9001 quality standard
